

7705366 - REMOTE ENABLE KIT

CLASSICflo & CLASSICflo BALANCED

Fitting instructions

DANGER: Isolate power to appliance before carrying out any electrical work

1. Remove screw from front of control panel enclosure and carefully pull the top of cover downwards, until it is fully opened (see photos below)

Screw

2. Clean the painted metal surface (so that it is free from grease and dust) and place the "Enable" sticker onto the bottom of the panel (see photo below).

3. Peel off one side of a sticky fixer and stick it over the terminal block symbol on the "Enable" label (see photo below)

4. Whilst applying pressure to the two locking tabs, gently pull off the 9 way connector from the honeywell control PCB (see photo below)

locking tab

Please read and understand these instructions before commencing installation and leave this manual with the customer for future reference.

5. Plug the new loom from this kit, into the honeywell control PCB and plug the original wiring connector into the new loom (see photos below)

6. Peel off the backing from the sticker fixer and place the terminal block onto the fixer, pushing firmly down to ensure good adhesion. Drill a suitable hole for the M12 grommet, and fit the supplied cable gland into the hole and secure with locknut.
7. Carefully replace cover and secure with screw. The fitting of this kit is complete.

Please read and understand these instructions before commencing installation and leave this manual with the customer for future reference.
